

**Amendments To The Specification**

Please replace the following paragraphs, with the corresponding following amended paragraphs:

[0063] In Fig. 5, it is arranged to structure the cradle 950 with an upper case 951, a flowing member 952, a bottom case [[953]] (not shown in Fig. 5), and CDL ornamental plates 954 and 955 to present the outer appearance thereof. On the outer circumferential side face of the upper case 951, there are arranged the CDL-DCin jack 956 for inserting the AC adopter cable serving as the power supply, and the windows 951a and 951b for making the eyesight recognition of the charging indication unit 909 possible for the battery charger 900 even when the printer is contained into the cradle [[959]] 950.
